Adding your Google Home smart devices (such as the mini)

Plug your Google Home smart device into the power and allow it to load. Once it has loaded it will announce its ready

1. On your Google Home App Home screen, click "Add"
2. Click "Set up device"
3. Click "Set up new devices"
4. Choose your home or create another home in which you want to install the device. Remember you will be handing this account over to your client so M-Elec suggests you use the default Home and click "NEXT"
5. Your device should automatically be found. Click on "NEXT" and allow the connection to take place
6. Confirm if you heard the sound by clicking "YES"
7. Allow or not allow sharing information by clicking "NO THANKS or YES, I'M IN"
8. If you know where the device will be located, select the location and click "NEXT"
9. Choose your Wi-Fi that the device will be connected to and click "NEXT"
10. If prompted for your Wi-Fi password, input the information and click "NEXT"
11. Once you are comfortable with details listed, click "NEXT"
12. Review data/details listed for the assistant experience and select either "NO, THANKS or TURN ON"
13. Select either to teach your assistant your voice or not by selecting "NO THANKS or I AGREE" Note: if you select "I AGREE" you will need to follow the on-screen prompts
14. Enter the home address where this device will be installed and click "NEXT"
15. Add your media services (if you have the client's login details) by clicking the "+" and following the prompts. Once finished click "NEXT"
16. Choose to get information from Google or not by selecting "NO THANKS or SIGN UP"
17. Review the information and click "NEXT". Click the finishing information until you return to the Home screen
18. Your first speaker should be ready now. Test her out by asking her to turn one of your installed devices on/off
