

Connecting Echo devices (such as the Echo Dot) to the Alexa App

1. Please note: This process is for setting up devices when you have opened the App previously. If you are opening the App for the first time you can follow the automatic procedure to connect your Echo devices.
2. Plug Alexa into a power outlet
3. Ensure it shows setup mode enabled (orange ring should be rotating). If this is not happening, hold the 'dot' button down until you hear the reset sound
4. Click on "Devices" in the bottom right corner
5. Click on "+" in the top right corner
6. Click on "Add Device"
7. Click on "Amazon Echo" 
8. Click on device you are trying to connect and select from the different versions
9. Click "Yes" to confirm you see a orange ring (step 2) (Press + hold  until orange light appears
10. Select your device under the "AVAILABLE DEVICES" list
11. Select your Wi-Fi network and add your password
12. Once connected to the Wi-Fi network click on CONTINUE
13. Add in your Echo's location (if you want to have it part of a "room") or click "Skip"
14. Test your devices operation
